PI-GAMMA-DRIVE

FOR ENTERTAINMENT & STAGE BUILDING

THE NEXT GENERATION - MORE EFFICIENCY THROUGH FLEXIBILITY

MORE THAN PRODUCTS. SOLUTIONS.

- ✓ 2-in-1-solution | 10% lighter | narrower
- ✓ The TECDOS drive unit with insert enables a 180° redirection
- ✓ When the insert is removed, the drive unit enables a redirection between 90° and 180°
- ✓ Lift at several points
The synchronization of the different lifting points is possible
- ✓ Durable, reliable and safe
- ✓ Flexible complete solutions for all requirements
- ✓ Easy installation of the drive and chain systems.
Even with longer applications. No stable mounting base needed
- ✓ Small sizes & heavy loads | quiet running
- ✓ Competent on-site service
- ✓ Black design

Triple strand with PI-GAMMA drive
Also possible in 5 and 6 fold arrangements with drive units depending on the application. Uniform lifting possible.

Double strand with PI-GAMMA drive
Also possible in 3 and 4 fold arrangements with drive units depending on the application. Uniform lifting possible.

Fourfold strand with PI-GAMMA drive
Also possible in 5 and 6 fold arrangements with drive units depending on the application. Uniform lifting possible.

Chain	No. of Pockets	Pitch circle diameter [mm]	L1 [mm]	L3 [mm]	L5 [mm]	L6 [mm]	D1 [mm]	D2 [mm]	D3 [mm]	D4 [mm]	D5 [mm]	Version	Weight [kg]	Part nr.

Contact us for more information.

1. Notice: Chain lubrication

When running over the drive and reversing wheels, the chain links are unwound under load. In order to minimise the friction between links, the hoist chain must be lubricated regularly in relation to the operating conditions.

2. Notice: Noise level

Regular chain service provides the noise level up to 30db(A).
